

Subject: The possibility of creating, editing and saving of new CRDi injector test plans, available in Common Rail Injector testing benches - Magneti Marelli series DS2R / CRU2R.

In Magneti Marelli DS2R / CRU2R injector testing devices, it is now possible to edit injector test plans, which are present in the current database. Below description of the edit procedure.

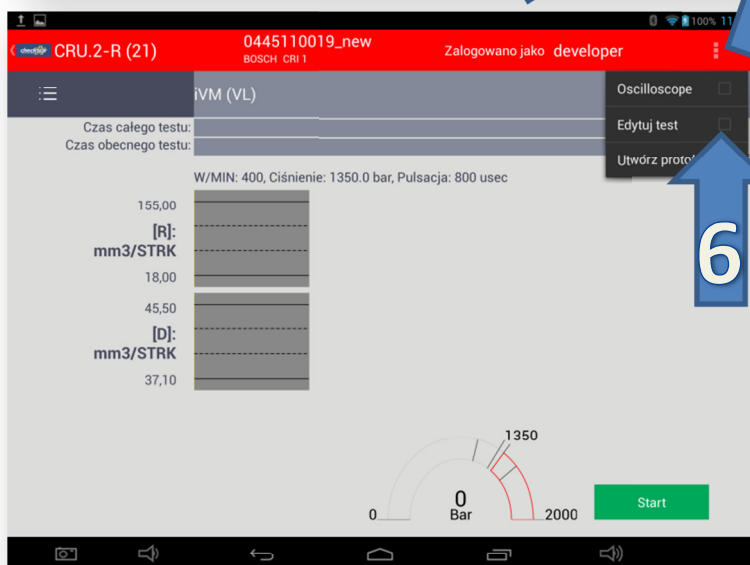

1. Duplicate test plan, to be edited. Always edit duplicated test plan, to avoid erasing of the original one.

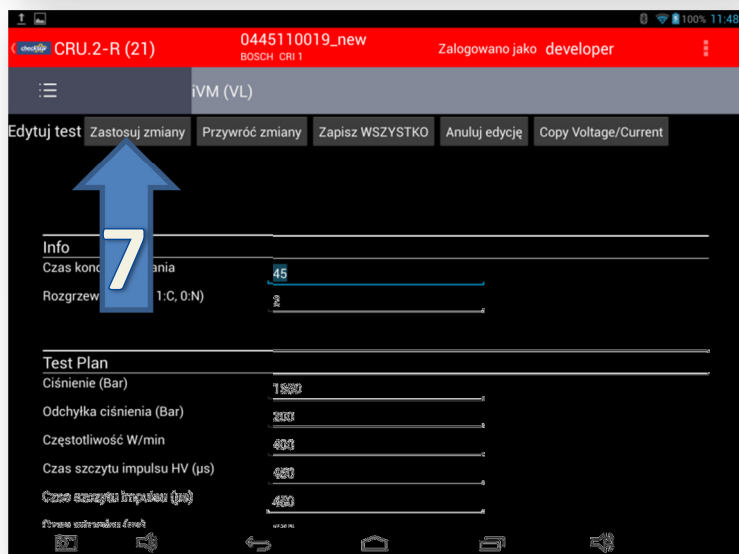

2. After confirming the duplication, the new test plan has "*_new" extension in a code

4. On the test selection screen, click on a symbol in upper right corner (1) and select "Manual mode" (2). After selecting the test plan that you want to edit (3), press "Next" (4).

5. On the test plan screen, click again on a symbol in upper right corner (5) and select "Edit test" (6)

3. After editing the values that you want to change, click on "Apply Changes" (7).
