

Subject: Test fluid for Magneti Marelli Common Rail injector testers.

To ensure the accuracy of the measurement, and extend the life of manufactured by Magneti Marelli Common Rail Injector testers: **DS** series (DS2i, DS2R), and especially **CRU** series (CRU2i, CRU2R), it is necessary to regularly (at least as indicated by internal counters) exchange test fluid, and filter. In the case of test benches equipped with an internal flushing function (MACC), cleaning fluid and its filter shall be exchanged as well.

We recommend using a special test fluid (007936200000), that meets all the standards, of the injector test bench manufacturer, and injectors producers. This will provide the necessary accuracy and protect the device from damage.

MM code	Description	Net price
Testing Fluid		
007936200000	Testing Fluid Diesel 20 L (meets Bosch VS 15665-OL-CV, ISO 4113-CV-AW, MAN, Volkswagen, MTU, Lucas CAV, MB DBL 6513 standards)	120,00
Fluid For Internal Cleaning		
007935095100	Fluid For Internal Cleaning Macc Diesel 2L	64,10
007935100270	Fluid For Internal Cleaning Macc Diesel 25L	666,67
Fluid For Ultrasonic Cleaner		
007935095120	Fluid For Ultrasonic Cleaner 4L (proportion 1:10)	64,10
007935100250	Fluid For Ultrasonic Cleaner 25L	333,33
